Subject: Re: Questions on VB/I70 OU2 comm strategy

Lets wait for the draft FS before we talk about "who will pay for costs." We should get the draft FS by the end of this month. Is that okay? By when do you need to finalize the communication strategy?

Subject: Questions on VB/I70 OU2 comm strategy

I have two questions that maybe you can clear up for me.

first, i have drafted a statement to the questions "who will pay for the selected cleanup" please look this over and help me understand how we want to state this in regard to the the businesses on OU2 and within the CERCLA law.

Second, one question that was asked, and will add to the comm strategy is " what are the health risks with exposure to lead and arsenic" can you please explain these risks to me so i can write an effective response, and for my understanding as well or course..Thanks,

Chris Wardell
